

GRAVITY (IN-STREAM)

ROUND DRAWER-IN-HOUSING

Ideal for low-profile applications

Our Round Drawer-In-Housing magnetic separators are designed for ferrous metal separation in processing systems. The Round Drawer-In-Housing Series is an in-stream magnet for dry, free flowing powders and granular products. Ideal for markets such as food, feed, grain and plastics, separation is achieved with magnetic tubes assembled in a drawer configuration.

The Round Housing comes standard models feature one or two rows of magnetic tubes. Taller model features (2) rows of tubes aligned on alternating centers, wherein the product will flow in a zigzag pattern while contacting the magnetic tubes. The cascade effect ensures maximum tramp metal separation by forcing product to repeatedly contact the magnetic tubes for optimum separation. An all-welded stainless-steel housing featuring a food-grade finish includes a silicone gasket with T-handle clamps for positive sealing.

The Round Housing is available with inlet/outlet sizes in 4", 5", 6" and 8" diameter. Sidewall diverters increase product contact with magnetic surfaces, and a drawer guard prevents product from shelving.

All models available with Ceramic or Rare Earth tube assemblies. Rare Earth models feature IMI's exclusive Opti® Series family of 1" OD magnetic circuits (See tech sheet TG-03A).

The tubes must be cleaned regularly to prevent build-up and wash-off of the collected ferrous metal. Simply wipe the captured metal off the tubes over a collection container.

FEATURES:

- » All welded T304 Stainless Steel housing
- » Food grade finish and construction
- » Silicone gasket with T-handle clamps for positive seal
- » Standard inlet/outlet sizes in 4", 6" and 8" diameter
- » Available in 1 & 2 row magnet configurations
- » Magnetic tubes are located on 2" centers within each row
- » Sidewall diverters to increase product contact with magnet
- » Drawer guard to prevent product shelving

OPTIONS:

- » Custom designed inlet and/or outlet flanges
- » Tubes located on 3" centers for difficult flow products
- » Wear resistant coating for abrasive products
- » Individual removable tubes for non food grade units
- » Ceramic magnets available
- » Sanitary construction available
- » Metal detectable, X-Ray inspectable gasket material
